SAMUEL FRASER'S LILACS  
Grown at Geneseo, New York

All on their own roots

A WORD ABOUT VARIETIES NOW OFFERED

- Mme. Casimir Perier Double White, flowers have two corollas curling inward. Chalcedony yellow in bud and white when expanded. Clusters large. A dependable annual bloomer.
- Mme. Lemoine A most satisfactory double white, dependable bloomer. Color in bud light yellow, when expanded white. Clusters medium to large, numerous
- Marie Legrave Single white, used in forcing. Flower buds light yellow, white when expanded. Clusters medium size.
- Obelisque Flowers small, semi-double or double. Buds Sea-foam Green, when expanded white. Clusters branched at base.
- Macrostachya The long cluster lilac, fragrant, single, the bud light purplish, when expanded light-pinkish. An unusual color, profuse bloomer. One of the most satisfactory.
- Charles X The Royal Lilac of France. Flowers single, medium size with buds Schoenfeld's Purple to light Purple and when expanded Argyle Purple without and Saccardo's Violet within. Clusters medium size. On its own roots, with us, it is not a tall grower. We have the Rochester, New York Park's lilac of this name. There are many variants.
- Leon Gambetta Large double flowers with long clusters. Buds cinnamon Drab to lilac and when expanded corolla lobes are Purplish with Pinkish lobes and show white and violet marking within. Striking, beautiful and with us stays in bloom three weeks. Seems susceptible to Oyster Shell Scale and powdery mildew. Must be sprayed.
- President Grevy A strong grower with large semi-double or double flowers. Buds deep Hellebore-Red to Pink, when expanded Mauvette ringed with pink without and Lavender violet tinged with Mauvette or white within. Clusters large, pyramidal. We have clusters 12 to 15 inches long. A wonderful plant to grow. Give it plenty of room and prune it back regularly.
